Education

Vanderbilt University | QuestBridge Recipient | Nashville, TN

May 2028

Major: Computer Science and Mathematics | Minor: Earth and Environmental Sciences

Relevant Courses: Algorithms, Statistics, Intro to C++, Discrete Structure, Data Structure, Intro to Java, Linear Algebra

Eastwood Academy High School | Houston, TX

Jun 2024

Leadership

VUceptor (Peer Mentor) | Vanderbilt University

Mar 2025 – Present

- Mentored 15+ first-year students through their academic and personal transition to college, serving as a trusted resource throughout the semester.
- Led and planned weekly discussions, community-building activities, and a semester-long orientation program designed to foster belonging and student success alongside a Vanderbilt faculty member.

Sophomore Liaison | FirstVU at Vanderbilt University

Feb 2026 – Apr 2025

- Planned and promoted community-building events for first-generation students, helping create opportunities for connection.
- Collaborated with executive board members to support FirstVU initiatives and strengthen the first-generation student community.

Vanderbilt Students Volunteers for Science (VSVS) | Team Lead (Oct 2024–Apr 2025); Lab Assistant (Sep 2025–Dec 2025)

- Led weekly hands-on science lessons for elementary and middle school students as part of a 3–4-member teaching team.
- Coordinated lesson materials, prepared volunteer kits, and maintained cost spreadsheets to support weekly classroom visits.
- Promoted STEM accessibility by creating engaging learning experiences for students in underserved Nashville-area schools.

Scholar | HeadStart Fellowship

Sep 2025 – Dec 2025

- Engaged in bi-weekly online sessions focused on preparing for pre-professional tech careers, including resume workshops and technical interview practice.
- Networked with industry professionals from leading tech firms and recent grads to gain insights into software engineering roles.

Projects

Tiny Footprint (In Progress) | HTML, CSS, JavaScript

Oct 2025 – Present

- Developing a sustainability-focused web application that allows users to track and categorize daily waste production, including recyclable, compostable, and landfill materials.
- Strengthening front-end development skills through responsive design, user interface development, and data organization.

Crawly Collection (In Progress) | HTML, CSS

May 2026 – Present

- Building an interactive educational website highlighting insects and their ecological importance through custom illustrations and engaging content by implementing a draggable interface to create a more interactive and accessible learning experience for users.
- Expanding knowledge of web development, user experience design, and creative approaches to science communication.

Urban Heat Island Effect in Texas | Independent Research Project

Feb 2025 – May 2025

- Collected and organized over 100 years of historical temperature data across Texas counties to investigate the Urban Heat Island Effect to build a structured database comparing large counties, smaller counties adjacent to urban areas, and rural counties.
- Analyzed long-term temperature trends and created graphs to visualize differences in warming patterns and the influence of urbanization using Microsoft Excel.
- Designed a research poster summarizing the project's findings and presented the research at a symposium-style showcase.

SKILLS

Language: Native – English, Native – Spanish

Programming & Software: Java, Python, C++, HTML/CSS, Microsoft Office, Git/GitHub, AutoCAD, Canva

Activities: Tutoring and Mentorship, Vanderbilt Ballet Folklorico

Recognition: Presidential Volunteer Service Award '24, Houston Art Car '24, Girls Who Code Summer Alum
